

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

REPORT OF CITY CONTROLLER

Pittsburgh, January 31, 1907.

To the Select and Common Councils of the City of Pittsburgh.
Gentlemen:

In obedience to the law and the custom, I herewith present for your consideration the financial operations of the City for the fiscal year closing January 31st, 1907.

The general statement of warrants drawn aggregate \$13,842,-710.86, or an increase of \$2,014,431.10 over the amount expended for all purposes in the preceding year. This is the net increase, the gross increase being \$2,619,764.89, which is offset by decreases in various items to the extent of \$605,333.79. Nearly all this decrease occurs in items found in the reserve funds and of the gross increase a still larger amount comes from the same class of funds. As the reserve funds are made up largely of monies for fixed charges and specified improvements, over which the City has no control, they bear little relation to department outlay.

The disposition of the general revenues and taxes is more closely traced in their application to the operating expenses of the principal departments of Public Works, Public Safety and Charities. These show a net increase of \$507,237.07 over the warrants drawn in 1905 by same departments.

Of this excess in expenditure, \$291,474.42 should properly be charged to the expense account of same departments for 1905, as the warrants for same were drawn in the first three months of fiscal year 1906, either to cover unpaid bills or meet extravagant administration of February and March of last year; so that the real excess of 1906 over 1905 was only \$215,762.65, or a net difference of \$215,762.65, all of which is more fully set forth in following table.

	INCREASE	DECREASE
Interest and Taxes on Loans	\$ 28,912.14	
Education	155,172.47	
Judgments	784,355.79	
Sub-School Districts	22,412.12	
Carnegie Library	86,644.20	
Redemption of Bonds	234,200.00	
Assessments for Streets	38,794.98	
Borough Indebtedness	8,318.54	
Water Extension	7,970.00	
" " Loan of 1900	380,158.79	
Parks	67,373.76	
Bridges	17,989.75	
Water Extension " " 1906	232,925.99	

	INCREASE	DECREASE
Streets and Sewers		68,968.26
Purchase of Investments		364,130.80
Firemen's Disability Fund.		22,455.13
Filtration Loan 1904.		102,480.31
Department of Public Works.	276,842.03	
" " " Safety.	142,350.32	
" " Charities	48,061.21	
Bridges, Steps and Boardwalks	64,805.53	
Miscellaneous.	22,477.27	
Street Repaving		25,037.00
New Engine House, etc..		22,262.29
Total	\$ 2,619,764.89	\$605,333.79
The Department warrants drawn, therefore, were more than in 1905, less bills paid in February and March, 1906, contracted in 1905, or a net increase in outlay.		
		\$507,237.07
		291,474.42
		\$215,762.65

Revenue

There was some notable increases in revenue during the year in which the Mayor's office nearly doubled its income at the expense of crime and through a daily accounting inaugurated by Mayor Guthrie in the first week of his administration. Wild debauch, turbulent revelry and indiscriminate violations of law now suffer full penalty, and when collected the money goes into the Treasury.

Switch License

The tax for switches and sidings, practically ignored in 1905, was given decent and needed attention in 1906 through notice to delinquents that the streets and highways of the City belonged to the people and that those who occupied them under City Ordinance must pay or take their tracks up. Some of the most belligerent were non-residents, competing in business with our own resident taxpayers. The ten days notice to pay or take up the obstructing tracks had the desired effect. They paid, and promise no further trouble.

The Traction Company

During the year, and in pursuance of a Supreme Court decision, the Traction Company paid into the Treasury \$48,109, the Court approving the right of the City to collect the tolls heretofore paid

by the Traction Company to the Smithfield Street Bridge Company, the matter having been in litigation for five years.

The case of the Point Bridge Company, involving tolls due by the Traction Company since 1896, is still in Court, but as the same questions are in dispute, the City hopes for a favorable decision at an early date. The amount in contention is large.

Light

A persistent discussion of the discrimination against the City in the price of light by the Allegheny County Light Company, was finally settled by your honorable bodies adopting the price agreed on at a conference between the Mayor, Controller, and Mr. Callery representing the Light Company, and covering a period of two years ending January 31st, 1908, at \$76.00 per light, instead of \$96.00, or an annual saving to the City of \$64,000, the present number of arc lamps in use being about 3,200. At this same conference Mayor Guthrie secured from Mr. Callery the admission that the Traction Company had not complied with the City Ordinances requiring the Company to keep the streets paved and clean within the tracks, and that an adjustment would be had early as possible and the amount paid over to the City. Up to the present time, however, this has not been done, though the account approximating \$100,000 for year 1906 has been rendered.

An Old Story in a New Dress

The old, old story of compelling the railroads to pay an equitable portion of the expense of the local government broke out again during the year, and under the auspices of a real reform Mayor, was given much encouragement. Whether any attempt to suppress this hitherto forbidden subject was or was not made, Mayor Guthrie was an active advocate of an equal tax on all classes and it only needed some one to demonstrate that this method had not prevailed.

The Controller, anxious for some years to break the ice and relieve the public of part of its load, and to increase the revenues of the City, began the work of comparison between property of the railroad and contiguous property of the individual. Comparisons were never more odious than those, with the result that twenty to twenty-five millions were added to railroad valuations for a start. Mayor Guthrie not only actively aided, but ordered all rights of way to be treated as other property and included in the assessment. How these corporations, through these many years avoided this obligation or were permitted to escape a plain duty, is suggestive, but not regarded by those who know why, as a prudent theme for public discussion.

The ownership of the City by public service and other corporations is now very much disputed and hereafter a much wider distribution of the taxing power is likely to be exercised. A sense of fairness on the part of those administering large corporations would leave little room for contention and disarm a municipality whose people have grown hostile from invasion of their rights. There is abundant room in a large city for all interests where gains and losses are wisely apportioned and the spirit of concession is cultivated, but there is a world of trouble always in store for those who acquire through force or power the property interests or privileges of another.

The City Gets the Worst of It

The practice of favoring Tom, Dick and Harry at the expense of the City, for local improvements was given some little attention during the year by the Board of Viewers, but not enough to show a definite change of policy. The City still gets the worst of it and the Board of Viewers still believe they are a law unto themselves, and are in no way responsible to the people, although employed exclusively in the adjustment of City matters.

The City should be treated as an individual in the matter of improvements and pay a proportionate assessment against any property it may own on the line of improvement, but it should not be used as a sort of "catch all" that other property owners may be relieved to prevent appeal. Abutting property should pay for its own improvement and if the proposed cost from the Viewers' view point is to be attended with sacrifice or hardship, the improvement should not be made. There is neither justice nor sense in taxing hill-top or South Side people or Lawrenceville citizens for improvements such as Webster Avenue or Sixth Avenue. The proceeding and the method in these two streets was as unfair as the appearance of the make-shift improvement is disgraceful. As stated and re-stated, at intervals, there are times when extraordinary demands for extraordinary sacrifice, to meet the necessities of a large community should be generously met, but these elements are lacking in ninety-nine cases out of a hundred where justice is chloroformed, while the cost of various improvements is distributed. His Honor, the Mayor, has interposed to prevent this injustice and to some extent has curbed it, but until thoughtful men with courage enough to compel every man to pay his own street and sewer obligations are selected by the Courts to do this work, or the vicious law repealed, the silly farce will be persisted in.

Change in License Rates

This also is an old song, but the older it grows the less effect it has. The Bill Poster pays no more tribute to the City now than he did twenty years ago, although he pastes his matter before five times as many people. The same with the Theatres; they pay twenty dollars a month now as the little Nickelodeon does, no more, no less and as similar amusements did at a time when the memory of man runneth not to the contrary.

There should be a revision of the whole revenue list and a new establishment of prices. Either that, or put them all on the free list and get full credit for being generous. The subjects of license are not in the charitable class and are willing to pay their way and pay well, and it is an affront to subject them to a charge of escaping just dues with a mere pittance.

Saving on Filtration Bonds

There has been some very sensible talk about filtration, its efficiency and cost and some very senseless chatter, and that the chaff may be threshed from the grain and the public be given the facts as to cost, it is essential that we begin with the Bonds, as the money to build the plant is wholly made up from bond proceeds. Of the first issue of \$2,500,000,—\$500,000 of it was applied to part payment of land and expenses of Filtration Commission in the initial stages of water purification. In the several years that elapsed the increase of population and the desire to cover all portions of the city with an up-to-date plant having capacity for future as well as present needs, a new loan of \$5,000,000 was authorized resulting in litigation about the character of the bonds and the charter provision as to their life and payment. When that was settled the Controller took the position that the borrowing of so much money before a contract for the work had been entered into, was bad policy and unjustifiable from any view point, and that instead of paying four per cent., the high credit of the city and the favorable condition of the money market warranted a three and one-half per cent. loan to be sold at periods as the work progressed, the Controller finally refusing to sign the bonds, if issued, unless these conditions were complied with.

Eight months of persistent adhesion to these businesslike requirements resulted in securing to the people all that was fought for, and an agreement was reached that \$2,000,000 of the \$5,000,000 authorized should be issued in 1905, \$2,000,000 in 1906, and the last \$1,000,000 in 1907, providing always that no more than was absolutely required for the work during its progress, should be issued.

The Economy of Such a Move

Had the whole \$5,600,000 in bonds at four per cent. been issued and sold in June, 1905, as contemplated, the interest charge to June, 1907, would have been \$400,000. Only \$2,000,000 at three and one-half per cent. were issued carrying an annual interest charge of \$70,000. In June, 1906, it was found necessary to issue only \$1,000,000 to carry the work along to June or July, 1907, the interest being \$35,000 plus the accrued interest of \$70,000 on the first \$2,000,000 for the second year. Thus we have a total interest charge to June, 1907, of \$175,000 in place of a four per cent. charge on \$5,000,000 or \$400,000, a saving to the City in two years of \$225,000.

We were able, through exchange of idle cash in the various Sinking Funds for a like amount of securities, to sell \$2,370,000 of the \$3,000,000 and pay into the Sinking Funds the interest the City would have paid to any holder, three and one-half per cent. on the \$2,370,000 sold to it as follows: Three and one-half per cent. on \$1,370,000 for two years or June, 1907, \$95,900 and the same rate on \$1,000,000 from June, 1906, to June, 1907, \$35,000, making an interest payment in two years of \$130,900 to the Sinking Funds. The balance of the \$3,000,000 issued, \$630,000, were sold to the Union Trust Company with an annual interest charge of \$22,050, or \$44,100 from June, 1905, to June 1907. True, the people had to pay the interest to the bondholders, but since they held \$2,370,000 of their own bonds in their own Sinking Fund and collected in the two years \$130,900 that usually go to outside or private investors. Independent of this, the people own the bonds they buy and are enabled to cancel them at any time they have the cash in the Sinking Fund.

The ordinary man, engrossed in other affairs of life has no time to figure out these interest problems and does not care to involve himself in the perplexities resulting from the computation of average cost, average life, or the earning power of bonds. It is not his work and should he undertake and finish it, he is in doubt about his conclusions or whether he has covered the ground correctly, and yet he is interested in knowing whether the common fund to which he has contributed has been judiciously managed.

Illustration

The best way to illustrate what may be done is to assume that the various Sinking Funds have to their credit \$5,000,000 of cash with no maturing obligations to take up within the year and as a prudent and safe investment exchange the cash for \$5,000,000 of bonds at par, bearing an annual interest of three and one-half per cent. or an aggregate return of \$175,000. The law permitting their issue requires the City at time of issue, to provide a Sinking Fund into

which shall be paid annually one-thirtieth of the face of the bonds, and so safeguard it that when the bonds mature the money to take up and cancel them will be in the Sinking Funds. This amount on the whole issue would be \$166,666.66. Add to this the interest, \$175,000, the City being the holder, and we have annually \$341,666.66. Multiply this by 15 and the Sinking Fund has at end of fifteen years, without compounding, a total cash sum of \$5,124,999.90 or \$124,999.90, more than is necessary to the payment of the entire loan, so that the life of a 30-year bond managed in this way is less than one-half the limit fixed for its maturity.

It may be said that the money available for the purchase of these bonds was borrowed from the other sinking funds, this is true, but it was possible to pay it back in annual sums of \$341,666.66 out of the charges fixed and provided by law.

This is not entirely practical when applied to the present filtration loan, as the sinking funds were not able to take all that was issued and meet other maturing indebtedness, but as set forth it will be largely taken as it has been and the savings from a cancerous interest growth will be marvellous. The average life of bonds managed in this way cannot exceed fifteen years, exclusive of the increment from compounding which belongs to the Sinking Funds from which the money was originally borrowed.

The New Bond Compared with the Old One

The new charter, written very largely by our present Mayor and City Solicitor, compels the municipality, when issuing bonds, to provide for the payment and surrender of one-thirtieth of the whole issue annually and when taken up interest ceases, so that in fifteen years from the date of issue, one-half of the whole issue has been taken up and one-half of the interest on the whole issue ceases. For instance, say the whole issue required is \$30,000 at five (5) per cent. and concurrently provision is made for a Sinking Fund of three and three-tenths per cent. annually, as well as an interest fund.

As the Sinking Fund charge amounts to \$1,000, it is preserved through the life of the issue and is applied annually to lift or pay the bond falling due at end of year.

At the time of issue, the first \$1,000 bond is paid off by applying the \$1,000 provided for the Sinking Fund, and so on, until the whole issue is taken up; the Sinking Fund being exhausted each year to take up the bond, while the interest decreased \$50.00 annually, so that the liability of the city grew less each year, and the bond itself matured as stated, in less than fifteen years, through decrease in annual interest.

The Old Method

Under the old system of issuing bonds, they could not be withdrawn after issue during their life of thirty (30) years, unless a holder desired to sell, and the opportunity to purchase at a fair premium was rare.

As the amount required for Sinking Fund purposes is the same under old or new law, and the interest is assumed to be the same, it is evident the difference must be in the duration of the bond and the economy of the new system over the old consists in the saving of interest, as follows:—

The average life of an issue of thirty-year bonds under the new system as shown, is fifteen years; therefore, \$1,000,000 at five (5) per cent., 30-year bonds would cost the city \$750,000 in interest, while under the old way, \$1,000,000 of 30-year five (5) per cent. bonds would cost the city \$1,500,000 in interest, as no portion of it could mature until the expiration of thirty years. Even though the Sinking Fund bought the whole issue and put the interest into the Sinking Fund, no part of the loan could be taken up nor could the interest cease on any portion of the loan, under the law, until the whole loan matured.

A Practical Illustration

It has been denied that this economy is practical and that the above views are mere theories. Happily, we have a case in point where practical application during the life of a bond issue sets the matter at rest and proves all that has been written of it. In 1888, the Borough of East Birmingham comprising the 25th and 26th wards, was unable to meet its bonded indebtedness and the amount lacking \$62,000 was refunded through the issue of thirty-year bonds at four per cent. The City sold the issue to the Water Loan Sinking Fund and provided under the law for a three and three-tenth Sinking Fund charge to take up the loan at maturity, 1918. As the bonds carried four per cent. interest that was also passed to the credit of the Sinking Fund, or an annual payment of seven and three-tenths when combined.

On taking charge of this office in 1902, or fourteen years after the issue of these bonds, it did not require much figuring to show that this debt had matured and that its Sinking Fund had to its credit the face of the bonds and a surplus of nearly \$2,000. I ordered the special tax on the people of these wards stricken from the levy and the bonds cancelled, which was done, although the life of the bond would not expire until 1918. Had these bonds been sold to a broker or any private investor, they could not have been withdrawn, but as the City held and owned the bonds, it could not defend the collection of more than the face of the debt.

What the former dynasty would have done with that \$64,000 in the following sixteen years, even though it should relieve the people of the special tax, was one of the things left unanswered when the old regime went out of business. Enough, however, at this time to say that the bond syndicate has also gone out of business, so far as this city is concerned. The only opportunity offered bond grafters now is participation in the four-tenths of one per cent. which the State imposes on its own citizens, while investors from other states pay nothing.

Added Proof

That the charter Act, relative to the issue of bonds, and provision for their maturity, when conformed to in spirit and letter, has been of incalculable benefit to this city, is further illustrated by the following comparison after five years of operation.

Public Debt January 31, 1902

Outstanding Bonds	\$ 21,506,201.87
Cash in Sinking Funds	\$ 17,613.51
Par Value of Bonds	4,492,863.14
Compromise Railroad Bonds. . . .	628,800.00
Cash in Compromise R. R. Fund ..	48,235.43
Total Sinking Fund Credit	5,637,512.08
Total Net Debt	\$ 15,868,689.79

Public Debt January 31, 1907

Outstanding Bonds	\$ 24,184,801.87
Bonds in Sinking Funds.. . . .	\$ 7,287,038.14
Cash in " "	183,249.73
Railroad Compromise Bonds held..	753,900.00
Cash Credit Compromise Bonds ..	97,991.71
Net Debt.	\$ 15,862,622.29

The net public debt, it will be noticed, is now \$6,067.50, smaller than it was five years ago, notwithstanding the following issues of bonds in that time:

To Pay Old Debts.	\$ 1,122,278.00
" " Smallpox Expenses.. . . .	300,000.00
" Meet Filtration Expenses	2,000,000.00
" " " "	1,000,000.00

To Pay Judgments.	1,000,000.00
" " Water Extension.	500,000.00
	<hr/>
	\$ 5,922,278.00

Attest: F. A. Kimball,
City Auditor.

Sinking Fund Commission

In the care and movement of the Sinking Funds, this city has been especially favored with sincere and honest men who lose no opportunity to promote the City's interests while planning and directing the movement and investment of public money under their control.

Mr. Pitcairn, the President of the Commission, has not only been thoughtful and attentive, but has been anxious and diligent in the discharge of his duty and has given freely of his time and experience to a necessary but thankless task, as has Mr. Morrow, its Secretary.

Thanks to Councils for courteous treatment, notwithstanding we seldom agree about anything. To Mr. Morrow, my valued assistant, Mr. Phelps, Auditor Kimball and the whole office force for their care, industry and intelligent help, my thanks are also extended.

Respectfully submitted,

J. B. Larkin,
Controller.

Report of Sinking Fund Commission Appointed Under
Act 1868

Pittsburgh, December 31, 1906.

JOHN B. LARKIN, Esq.,
City Controller.

Dear Sir:—

I have the honor to report as Secretary of the Railroad Sinking Fund Commission, that we have in our possession bonds as follows:—

5%	amounting to	\$ 663,200	
4%	"	"	90,700
		—————	a total of
		\$ 753,900	

and cash balance in Bank amounting to \$97,991.71. This report is to the 1st of February, 1907, which we respectfully report.

Yours truly,

A. F. KEATING,

Secretary.

Department of Assessors

Pittsburgh, Pa., March 14th, 1907.

*John B. Larkin, Esq.,
City Controller.*

Sir:

In accordance with an act, providing for the classification of real estate for the purpose of Taxation and for the appointment of Assessors in cities of the second class, approved July 9th, 1897, we herewith return to you the aggregate amount of City, Special and Sub-District School Taxes, levied in accordance with an Ordinance entitled: An Ordinance levying taxes assessing water rents and making appropriation for the Fiscal Year beginning February 1st, 1906, and approved March 5th, 1906.

Respectfully submitted,

A. J. PITCAIRN,
JNO. LAWLEY,
E. E. SIEBERT,
JERE DOHERTY,
H. C. DIGBY,
Board of Assessors.

Department of Assessors

Pittsburgh, Pa., October 25th, 1906.

J. B. Larkin,
City Controller.

Dear Sir:

We hand you herewith additional assessments of Current Expense, Sinking Fund and Interest, Special and Sub-District School Taxes and deductions to correct errors assessed since our reports of March 14th, 1906.

Respectfully,

E. E. SIEBERT,
A. J. PITCAIRN,
T. C. McMAHON,
H. C. DIGBY,
JOHN LAWLEY,

Board of Assessors.

Department of Public Works

Pittsburgh, Pa., June 1st, 1906.

*Jas. W. Clark, Esq.,**Director Dep't of Public Works.*

Dear Sir:

The following report shows the amount of Water Rents assessed in each ward of the city for the year 1906 and returned to the City Treasurer for collection.

Yours respectfully,

WM. SPRAGUE,

Superintendent.

Delinquent 2d Assessment Water Rents	\$10,115.61
Exonerations	572.05

Yours respectfully,

J. F. STEEL,
City Treasurer.
T.

Commonwealth of Pennsylvania, }
City of Pittsburgh. } ss:

On this 18th day of April, A. D. 1907, before me the subscriber, Geo. W. Guthrie, Mayor, of Pittsburgh, personally appeared J. B. Larkin, Controller of said City, who being duly affirmed doth depose and say to the best of his knowledge and belief, the foregoing statements of the finances of the City of Pittsburgh are just, correct and true, having been carefully compared with the books in the Controller's office of said City.

J. B. LARKIN,

Controller.

Affirmed and subscribed before me, on the date above written.
Witness my hand and the seal of the City of Pittsburgh.

GEO. W. GUTHRIE,

Mayor.

(Seal)

APPENDIX

Department of Assessors

Pittsburgh, Pa., March 25, 1907.

To the Select and Common Councils:

Gentlemen :

In accordance with Section 3 of an Act of Assembly, entitled "An Act creating the Board of Assessors," etc., in Cities of the Second Class, approved July 9th, 1897, we herewith return to you the aggregate valuation of the several Wards of the City for the year 1907.

Respectfully submitted,

E. E. SIEBERT,
JOHN LAWLEY,
T. C. McMAHON,
Board of Assessors.
